### **DETAILED ACTION**

The amendment filed April 29, 2003 has been entered. Claim 38 is cancelled, claims 1-37 and 39-42 are pending, and claims 2-6 and 8-37 remain withdrawn.

#### ***Specification***

The disclosure is objected to because of the following informalities:

Page 24, line 15, the terms “ $\phi 0.5$ ” and “C0.7” are not clearly understood.

Appropriate correction is required.

#### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 7 and 39-42 are rejected under 35 U.S.C. 102(b) as being anticipated by Tsubouchi et al (Figure 1). By definition, nozzles comprise divergent cross sections at the outlet side thereof. The nozzles 41-45 in fuel supply plate of chamber 3, inherently each having a divergent cross section is read as “avoiding means” or “avoiding portions.”

#### ***Response to Arguments***

With respect to the objection to the specification, the terms “ $\phi 0.5$ ” and “C0.7” may very well be art terms. However, the terms are not dimensionless and require some unit of measure.

The rejection under 35 U.S.C. 112, second paragraph is withdrawn.

The rejections in view of Andrew, Petit et al and Kinney, Jr. et al are withdrawn.

No further comments are deemed necessary at this time.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Applicant is reminded of his duty to disclose under 37 CFR § 1.56, which states in part:

**Duty to disclose information material to patentability.**

(a) A patent by its very nature is affected with a public interest. The public interest is best served, and the most effective patent examination occurs when, at the time an application is being examined, the Office is aware of and evaluates the teachings of all information material to patentability. Each individual associated with the filing and prosecution of a patent application has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability as defined in this section. The duty to disclose information exists with respect to each pending claim until the claim is cancelled or withdrawn from consideration, or the application becomes abandoned.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
